

The image shows two pages from the Cengage Pathways textbook. The left page is titled 'AT HOME ON MARS' and features a large illustration of a Martian landscape with a rover and a person. The right page is titled 'PLACES TO EXPLORE IN PATHWAYS' and features a large illustration of a rocky, mountainous landscape. Both pages include text and images related to the topics.

Cengage Pathways

Developed in two strands — *Reading, Writing, and Critical Thinking* and *Listening, Speaking, and Critical Thinking* — each consisting of five levels, this innovative Cengage + National Geographic Learning ELL program has met with great success. Its achievements, as reported from both the classroom and the critics, are due in part to its striking design that captures attention without competing with pedagogy.
